

Internet Technology Instructor at Sea!

SeaMobile is seeking experienced, dynamic and motivated individuals to fill the shipboard position of **Internet Technology Instructor** onboard luxury cruise liners. Position requires prior teaching and/or public speaking experience, strong computer knowledge (wireless internet experience and basic networking skills a plus), internet savvy, sales-orientated management ability and excellent customer service skills. Successful candidate will thrive in a fast-paced environment, be patient and courteous, project professionalism at all times and will have exceptional communication skills. Extensive travel up to 5 months at a time required. Must have a valid passport and be able to travel internationally.

More about this position ...

The Internet Technology Instructor is responsible for teaching computer classes to cruise ship guests, as well as ensuring the efficient and optimal day-to-day operation of the shipboard Internet (and affiliated) services. Class curriculum includes multiple levels of Word, Excel, PowerPoint, Windows, Movie Maker, Web Design using FrontPage, photo editing using Adobe Photoshop Elements, Internet and Email based classes, as well as basic introductory classes for absolute beginners. Responsibilities include delivering the above curriculum, preparing class schedules, facilitating sign-ups, effectively marketing the program onboard each vessel to achieve pre-determined revenue goals, and communicating between ship departments. This employee also handles all other Internet revenue-generating activities onboard, for both guests and crew, while working closely with shipboard cruise line Staff and Management.

To be considered for this position, email cover letter, resume and photo to:

jobs@seamobile.com

Only candidates who match the above criteria need apply.

Please note: SeaMobile cannot interview any applicants currently onboard any vessel.
