

INTERNET SERVICES

INTERNET CAFÉS & WIFI

**BE IN THE MIDDLE
OF NOWHERE.**

**AND AT THE CENTER
OF EVERYTHING.™**

People want to stay connected even in the middle of nowhere. Your guests and crew are no different. As the leading provider of global VSAT satellite networks to nearly every cruise ship in the world, SeaMobile offers more ways than ever to

keep your guests and crew connected at sea and take advantage of additional revenue opportunities. Among our many communications services, we provide Internet Cafés and WiFi services to over 160 cruise ships and other vessels at sea.

INTERNET CAFÉS & WIFI SERVICES

With our turnkey design, Internet Cafés and WiFi services provide more than a “business center” on board. They provide you with another source of revenue based on usage. Guests and crew will love how easy it is to access an infinite amount of information such as email, search engines, Google® maps, weather and more. And you’ll have the comfort of knowing that this simple and valuable revenue opportunity is managed and kept secure by SeaMobile.

Based on customer need, we can provide the hardware, software, and technical support to create and manage your onboard Internet Café and WiFi services, including a highly trained onboard Internet Café Manager. We also offer multiple billing and payment options using prepaid cards, credit card billing, and folio billing.

Like all services from SeaMobile, our MTN Satellite Services division provides the global VSAT satellite communications network for data transmission with all necessary firewalls and security. In addition, our expert network engineers and technicians manage our VSAT network with real-time monitoring of system availability, global spare parts depot, and 24/7 customer support to make sure service to your guests and crew is always available.

INTERNET ACCESS PACKAGES FOR GROUPS & CHARTERS

Among our many value-add services, we offer groups and charters special pricing for our Internet services, making it easy for people to stay connected. SeaMobile’s Internet Access packages offer groups and charters at sea the ultimate in convenience and the most value for Internet access.

Groups can purchase packages in three prepaid plan options: Gold plan for 1,000 minutes, Silver plan for 500 minutes, and White plan for 100 minutes. Full ship charters can choose to prepay for unlimited Internet access throughout the cruise. We simply turn on our systems for infinite access to our Internet services from the Internet Café workstations and on personal laptops in areas where wireless service is available. Our prepaid packages include additional value-add benefits, allowing groups and charters to take full advantage of our Internet services at sea.

SEAMOBILE PORTAL FOR GUESTS & CREW

Through our innovative SeaMobile Portal, we’ve expanded the capabilities of our on-ship network and the opportunities for guests and crew at sea to easily access even more information through the Internet. Our Internet Services team can also work with you to design a customized and branded portal page to deliver your message to guests and crew, as well as advertise services onboard ship or in port.

Internet services from SeaMobile puts people at the center of everything, even in the middle of nowhere.
